Introduction

CHAPTER 1: Interview Process
Types of Interviews
- Phone Interviews
- On-Site Interviews

Phases of Interviews
- Behavior Interview
- Technical Interview
- Q/A Time

Summary

CHAPTER 2: Programming Languages
C
- Palindrome Numbers

C++
- C++ Concepts
- Analyzing Execution of C++ Code
- Implementing a Class or Member Function in C++
- Assignment Operator

C#
- Singleton

Java
- Java Keywords
- Data Containers
- Thread Scheduler

Summary

CHAPTER 3: Data Structures
Arrays
- Duplication in an Array
- Search in a 2-D Matrix

String
- Strings in C/C++
- Strings in C#
- Strings in Java
- Replace Blanks in a String
- String Matching

Linked Lists
- Print Lists from Tail to Head
- Sort Lists
- Loop in List

Trees
- Next Nodes in Binary Trees
- Binary Search Tree Verification

Stack and Queue
- Build a Queue with Two Stacks
- Build a Stack with Two Queues

Summary

CHAPTER 4: Algorithms
Recursion and Iteration
- Fibonacci Sequence

Search and Sort
- Binary Search in Partially Sorted Arrays
- Majorities in Arrays

Backtracking

String Path in Matrix
Robot Move
Dynamic Programming and Greedy Algorithms
Edit Distance
Minimal Number of Coins for Change
Minimal Times of Presses on Keyboards
Bit Operations
Number of 1s in Binary
Numbers Occurring Only Once
Summary
CHAPTER 5: High Quality Code
Clearness
Completeness
Test Cases for Completeness
Strategies to Handle Errors
Power of Integers
Big Numbers as Strings
Delete Nodes from a List
Partition Numbers in Arrays
Robustness
k^{th} Node from End
Reverse a List
Substructures in Trees
Summary
CHAPTER 6: Approaches to Solutions
Figures to Visualize Problems
Mirror of Binary Trees
Print Matrix in Spiral Order
Clone Complex Lists
Examples to Simplify Problems
Stack with Min Function
Push and Pop Sequence of Stacks
Print Binary Trees Level by Level
Paths in Binary Trees
Divide and Conquer
Traversal Sequences and Binary Trees
Binary Search Trees and Double-Linked Lists
Permutation and Combination
Summary
CHAPTER 7: Optimization
Time Efficiency
Median in a Stream
Minimum k Numbers
Intersection of Sorted Arrays
Greatest Sum of Sub-Arrays
Digit 1 Appears in Sequence from 1 to n
Concatenate an Array to Get a Minimum Number
Space-Time Trade-Off
Ugly Numbers
Hash Tables for Characters
Reversed Pairs in Array
First Intersection Node in Two Lists
Summary
CHAPTER 8: Skills for Interviews
Communication and Learning Skills
Communications Skills
Learning Skills
Knowledge Migration Skill
Time of Occurrences in a Sorted Array
Application of Binary Tree Traversals
Sum in Sequences
Reversing Words and Rotating Strings
Maximum in a Queue
Mathematical Modeling Skill
Probabilities of Dice Points
Last Number in a Circle

Minimum Number of Moves to Sort Cards
Most Profit from Stock
Divergent Thinking Skills
Calculating 1+2+…+*n*
Implementation of +, -, *, and /
Final/Sealed Classes in C++
Array Construction
Summary
CHAPTER 9: Interview Cases
Integer Value from a String
The Interviewer's Comments
Lowest Common Parent Node in a Tree
The Interviewer's Comments
Index
